Adept PublishWave System Requirements

Adept PublishWave is a comprehensive batch printing and publishing plug in to the Adept Document Management software. PublishWave enables Adept users to submit publishing and printing jobs either manually or automatically. For the purposes of this document, we refer to “printing” as hard copy paper-based output and “publishing” as electronic output to a file, including PDF, DWF, and TIF file format.

Adept PublishWave includes several software components that make up the PublishWave Server and the PublishWave Client. These programs include:

- **PublishWave Server:** The workstation-based program that accepts printing and publishing requests from Adept users and submits them to the respective CAD or Microsoft Windows applications for processing.

Note: The PublishWave Server application must be run as an application and not as a service. This requires that PublishWave is logged into at all times while the application is running. The PublishWave workstation, however, may be locked to prevent unauthorized access.

Note: The PublishWave Server application must be installed on a dedicated machine running a workstation Windows Operating System (e.g.: Windows XP Professional)—not on the network server.

- **PublishWave Server Administration:** This application is used by an Adept Administrator to configure the PublishWave Server, including defining output devices, formats, and print input and output queues.
- **PublishWave PlugIn:** This is the Adept Client-based PlugIn program that is used to submit printing and publishing output requests to the PublishWave Server. This program is installed on the Adept Client as a PlugIn program and is installed on any users’ workstations that require access to PublishWave.

PublishWave Server Application Requirements

PublishWave Server Application Requirements	
Supported Operating Systems	Microsoft Windows XP Professional workstation (must be 32 bit) with the latest service packs installed
Supported CAD and Microsoft Office application software as needed for output with all the latest service packs installed	Required
System Printers configured as Windows System output devices	Optional: Only required if printing

PublishWave Server Application Requirements (continued)

Adept Client software version 8.1.2 or later	Optional: If using the PublishToAdept feature
Microsoft .NET Framework 2.0 Service Pack 1 or greater	Required
Firebird 1.5.3 (included in the Server Software install)	Required
Microsoft XML 4.0 Service Pack 2	Required
Internet access	If not, product must be authorized manually.

Supported Applications

- Microsoft Word and Excel 2003/2007
- AutoCAD 2008/2009/2010*
- Inventor 2009/2010
- SolidWorks 2008/2009/2010

* PublishWave does not currently provide TIF support for AutoCAD 2010. If you require TIF output from AutoCAD, we recommend that you remain at your current version of PublishWave until we deliver TIF support for AutoCAD 2010 in a future version.

PublishWave Client PlugIn Requirements

PublishWave Client PlugIn Requirements

Adept Client software Version 8.1.2 or later	Required
Microsoft .NET Framework 2.0 Service Pack 1 or above	Required
